

Blood Program

Considering Starting a Blood Program?

Across the country, people are dying from severe bleeding not because their injuries were unsurvivable, but because lifesaving blood was out of reach at the point of injury. Severe hemorrhage remains one of the most critical challenges in EMS, and for the right patients, timely access to blood can change the entire trajectory of care.

But closing that gap takes more than the blood itself. A successful program connects sound protocols, policies, and procedures with dependable supplier partners and the right products behind every step. Bound Tree Medical understands how these pieces fit—and how to help you bring them together into one reliable program.

Bound Tree Can Help!

Education: Bound Tree Medical Account Managers are equipped with the knowledge and resources on how to get a blood program started with your agency.

Products: Bound Tree Medical warehouses are stocked with all the necessary equipment and products to shift your blood program from concept to completion.

Network: Bound Tree Medical brings robust relationships with trusted supplier partners and industry experts—so whatever you need to move your program forward, we have a resource to connect you with.

Together We Can Save Lives!

Ask your Bound Tree Account Manager about how we can support your Blood Program
