Neo-Tee®

Disposable Infant T-Piece Resuscitator

LEARN MORE

About

The First Disposable Infant T-Piece Resuscitator with built-in manometer and optional pressure relief override. The Neo-Tee® is flow-controlled and pressure limited. It offers the ability to measure a more consistent, targeted Peak Inspiratory Pressure (PIP) and Positive End-Expiratory Pressure (PEEP). With Neo-Tee®, there's absolutely NO capital equipment to purchase and it is completely disposable. Even Better . . . No fatigue from squeezing a bag since there is no bag to squeeze.

Advantages

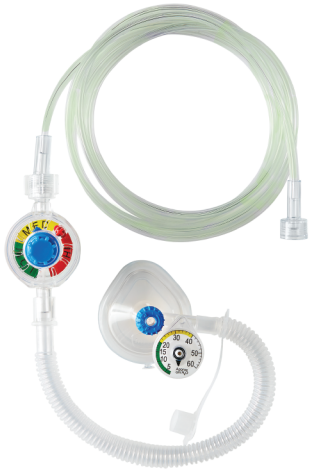

- Designed in conjunction with leading facilities.
- 5 LPM achieve PEEP up to 10 cm H_2O.
- Override button only allows pressures > 40 cm H_2O.
- Perfect for transport, longer tank time.
- Improves patient safety and EMT clinician confidence.
- MR conditional.
- No fatigue from squeezing a bag.
- DEHP-Free.

(10/Box)

Neo-Tee® with Higher
PEEP Capability
(Orange PEEP Knob)
(10/Box)

Clinical Use

- Intended for infants weighing less than 10 kg.
- Helps provide consistent pressures.
- Helps deliver ventilation more successfully and reduce potential pneumothorax & chronic lung injury caused by over-inflation of the lungs.
- In-line version allows quick change of inspiratory pressure next to the baby. (12 inches from Tee)
- Color-coded manometer on tee for quick and easy viewing of PIP and PEEP pressures.
- No capital equipment, warranty/maintenance costs. (Affordable at every bedside)
- No cleaning. (Reduces chances of cross-contamination)
- Space saving, lightweight, great for transport.
