S-Guide

Malleable intubating guide for difficult airway management

/ S-Guide

S-Guide is an intubation aid for difficult airway management and facilitates orotracheal intubation, especially in patients where visualisation of the glottis is inadequate.

Due to its **malleability**, it is suitable for direct and indirect laryngoscopy, in particular for video laryngoscopes with non channelled blades.

Supplied with two types of O₂ Connectors, **oxygenation*** is possible throughout the whole intubating process. Not impairing oxygenation even when the S-Guide is bent. The S-Guide is provided with a coloured, preformed and atraumatic **soft tip**.

*Oxygenation is possible with the sizes 11Fr and 15Fr. Oxygenation is not possible with the size 8Fr.

Features

Soft and Atraumatic Tip

- Preformed
- Coloured:
 - For better visualisation within the glottic structures
 - For easy size recognition

Oxygenation*

- For sizes 11Fr and 15Fr
- Three openings at the distal end of the S-Guide to ensure appropriate oxygen flow
- Supplied with two types of O₂ Connectors

Malleability

- Specific design of material combines:
 - Malleability, to preform the tracheal tube
 - Rigidity, to manoeuvre the tracheal tube
- Special black marking on the sizes 11Fr and 15Fr shows ideal position to preform the tracheal tube (hockey-stick marking)

Order information

S-Guide / Two types of O₂ Connectors included (11Fr and 15Fr), for single use, sterile

| Size | Length | Centimetre Markings | For Tracheal Tube | REF | Box |
|------|--------|---------------------|-------------------|-------------|-----|
| 8Fr | 40cm | 5 to 30cm | ≥ 3.0mm I.D. | 33-92-400-1 | 5 |
| 11Fr | 65cm | 5 to 40cm | ≥ 4.5mm I.D. | 33-91-650-1 | 5 |
| 15Fr | 65cm | 5 to 40cm | ≥ 6.0mm I.D. | 33-90-650-1 | 5 |
